Year 9 Courses

1. In choosing subjects at Year 9 level you should always make sure that you keep all your options open and take as wide a range of subjects as you can. In other words, do not decide to drop subjects which later on you may decide to take up again. This applies especially to subjects where you build up your knowledge and skills each year, for example, languages and art & craft subjects.

2. If you have no real idea of what you want to do when you leave school, it might help to talk to Mr Kortuem in the Careers Room. It is difficult to choose subjects if you do not know what you are aiming for.

3. You will study 5 compulsory subjects: English, Health & Physical Education, Humanities, Mathematics, Science, and one of French, Italian, Japanese or Vietnamese. You will have the choice of 4 elective units.

4. When choosing your elective subjects, think about your interests and ability in the different subject areas. You must do at least one semester from the Arts Elective area. Your remaining electives may be chosen from any of those electives listed on page 6.

You have been asked to select 4 more electives than is necessary. This is so that if your first choices do not run due to low class sizes, you will be placed in your next choice as much as possible. So it is important to list electives in order of priority. The electives offered will depend on staff availability, student demand and certain other organisational arrangements.

5. Any questions about the material in this booklet can be directed to your Year Level Coordinator, Subject Coordinator, and the Careers Teacher.

Ms McKenzie
Ms Annetts
Ms Bryant
Ms Dorigo

Middle School Coordination Team
Careers Introduction

There are 3 factors to be considered when deciding on subjects:

1. Do you have some ability in the type of subject?
2. Do you enjoy that field of study?
3. How does it relate to your career intentions?

You should begin now finding out as much information as possible about different careers. To find out more about careers –

1. **Talk to People** - A good way of finding out what jobs are most likely to appeal to you is by talking to as many people as possible about the work they do.

2. **Work Experience** - This can give you an insight into the world of work and an awareness of whether a particular job is right for you. Year 10 students do work experience the last two weeks of term two.

3. **Vocational Guidance** - There are people who can offer you specialised help in the careers area. Begin by visiting the Careers Room and talking to your Careers teacher at school.

4. Check out the following web pages:
   - My Future   [www.myfuture.edu.au](http://www.myfuture.edu.au)
   - VTAC Course Link (free service)  
     An interactive web-based program aimed to assist students in Years 10-12 and their parents to investigate course options based on arrange of criteria, including interests, studies undertaken and results. [www.vtac.edu.au](http://www.vtac.edu.au)

**An Introduction to Victorian Certificate of Education (VCE):**

- The V.C.E. is a two-year course, covering both Year 11 and Year 12 studies.
- There is a wide range of studies leading to the Victorian Certificate of Education (VCE).
- Studies in the VCE are organised in UNITS and each UNIT will take a half year (or SEMESTER) to complete.
- Over the two years of their VCE program, most students will study twenty-two units.
- To receive the certificate - the VCE - students will have to **satisfactorily complete** at least sixteen units, including compulsory studies.
- More information regarding the VCE will be explained to you next year.
All students study the following core subjects:

**FULL YEAR**
- English/EAL/Extension English

Mathematics/Year 10 Maths B
- Health & Physical Education
- Science
- Humanities

**ALL STUDENTS ALSO STUDY ONE OF:**
- French
- Italian
- Japanese
- Vietnamese

All students must complete **four electives**, one of which must be an Arts Elective and one must be a DC&T Elective. The remaining two can come from any of the four groups.

Choose **four other electives** in case you are unable to be placed in your first preferences, one of which must be an Arts Elective, and one must be a D.C. & T. Elective.

Parent Signature: ____________________________

---
CORE SUBJECTS

ENGLISH

Length of Course
Full year subject

Aims
- To develop students’ ability in approaching language critically.
- To develop in students the ability to use various styles for different writing situations.
- To develop students’ speaking and listening skills.
- To develop students’ appreciation of literature.
- To improve and consolidate students’ basic English skills, and where possible, to develop students’ computer skills.
- To develop in students the ability to read for pleasure.

Overview
Participation in many aspects of Australian life depends on effective communication in Standard Australian English and English is invaluable globally. The study of English helps create confident communicators, imaginative thinkers and informed citizens and helps young people develop the knowledge and skills needed for education, training and the workplace.

Content / Skills
In English, students learn to:
- listen to, read, view, speak, write, create and reflect on spoken, written and multimodal texts
- appreciate, enjoy and use the English language to evoke feelings, convey information, form ideas, interact with others, entertain, persuade and argue
- develop interest and skills in inquiring into various forms of texts, and literature
CORE SUBJECTS

ENGLISH AS AN ADDITIONAL LANGUAGE (EAL)

Length of Course
Full year subject

The EAL course at St Albans Secondary College is structured according to the language needs and levels of the EAL students. Students are assigned to the appropriate language level classes that will best meet their needs.

Aims

- To improve listening, speaking, reading and writing skills through practice and reflection.
- To communicate effectively in writing and speech in a variety of contexts.
- To understand and use in meaningful contexts the systems of spoken and written English, that is, its conventions of sounds, spelling, word formation, vocabulary and grammatical structures.
- To enjoy and find value in a wide range of language activities.
- To develop the skills of comprehension and interpretation.

Overview

Participation in many aspects of Australian life depends on effective communication in Standard Australian English and English is invaluable globally. The study of EAL/D helps create confident communicators, imaginative thinkers and informed citizens and helps students from non-English speaking backgrounds to develop the knowledge and skills needed for education, training and the workplace. EAL/D classes provide students with additional time and support and specialised teaching to addresses students’ developing language proficiency.

Content / Skills

In EAL, students learn to:
- listen to, read, view, speak, write, create and reflect on spoken, written and multimodal texts
- appreciate, enjoy and use the English language to evoke feelings, convey information, form ideas, interact with others, entertain, persuade and argue
- develop interest and skills in inquiring into various forms of texts, and literature

Selection Advice

EAL/D classes are for students who speak a language other than English at home and who have been enrolled in an Australian school for less than five years.
**CORE SUBJECTS**

**EXTENSION ENGLISH**

**Overview**

Extension English focuses on developing students’ analytical, creative and critical thinking and communication skills. Through close study and wide reading, viewing and listening, students develop the ability to appreciate and evaluate the purpose, stylistic qualities and conventions of literary and non-literary texts and enjoy creating their own imaginative, interpretive and analytical responses.

**Content / Skills**

Extension English students refine their skills by engaging critically and creatively with texts and they hone their oral communication skills through discussion, debate and argument, in a range of formal and informal situations. In addition to the content and skills of the English course, Extension English aims to develop students’:

- understanding of the use of the English language
- appreciation and creation of interpretive, persuasive and imaginative texts
- engagement in critical analysis and reflection

**Selection advice:**

Extension English is offered to students who achieve an exemplary result in Year 8 Extension English and it may be offered to other Year 8 students if their English teacher recommends them for the course. Students of Extension English need to be highly motivated to study at an advanced level and to take on an increased workload.
Overview

The Literacy Support Program is designed to develop students’ literacy and communication skills in order to help them meet the academic demands of secondary school students.

Content / Skills

- During highly structured lessons, students in the Literacy Support Program: develop decoding and reading comprehension skills during independent and group reading sessions
- continue to build their vocabulary and practice proofreading and editing; and skills learn to write a variety of text types
- learn to identify, understand and analyse a variety of visuals texts
- begin to create meaningful visual texts of their own

Selection Advice

Entry into the LSP/E subjects is by teacher recommendation.
**CORE SUBJECTS**

**HEALTH & PHYSICAL EDUCATION**

**Length of Course**
Full year subject

**Aims**
- To develop the desire and ability to actively participate in physical activity throughout life.
- To develop the ability, knowledge and understanding of movement and movement skills in a range of physical recreational pursuits.
- Students maintain regular participation in moderate to vigorous physical activity and analyse and evaluate their level of involvement in physical activity.
- Students describe the physical, emotional and social changes that occur as a result of the adolescent stage of the life span.
- Students identify the outcomes of risk-taking behaviour and apply harm minimisation strategies.

**Subject Content**
- Core Physical Education consists of two practical periods and one period of theoretical work per week. Activities will involve the use of facilities which are school based as well as community based activities.

**Practical Activities**
- Fitness
- Basketball
- Tennis
- Softball
- European handball
- Badminton
- Football Codes
- Indoor Hockey
- Roller Blading
- Ten Pin Bowling

**Theoretical Activities**
- Students will investigate healthy relationships, in particular sexual relationships and abuse in relationships. They will also discuss risk-taking and minimising harm.
- They will look at risk-taking and why young people take risks. The harm-minimisation approach towards substance abuse and road safety will be discussed.
- Students will learn about training programs and the procedures needed to implement a successful training program.
- They will analyse a variety of movement skills and sequences and apply biomechanical principles to the analysis of sport.

**Required Clothing**
- School Sports tracksuit pants/shorts
- School Sports polo top and tracksuit top
- Runners

**NOTE:** There is a charge attached to this subject of approximately $27.50 per year which covers the cost of selected activities.
CORE SUBJECTS

HUMANITIES

Length of Course
Full year subject

Aims

- To provide students with the opportunity to understand the Australian economy and to learn how to best manage their personal finances
- To develop students understanding of how humans interact with natural environments and how we can best manage these environments
- To understand the history of the modern world from 1750-1918
- To take a holistic approach to studying the Humanities, making links between disciplines and always drawing on knowledge and skills learnt outside the focus of the study.

Subject Content

The subject will take an integrated approach to studying the Humanities (Commerce, Geography, Civics and Citizenship, Australian History) and will include one community based project.

Students will study the following topics:

- The Australian economy
- How to make informed personal economic decisions
- The Industrial Revolution
- Australian History from colonial times until federation
- The First World War
- What democracy means in Australia
- Hands on approach to understand and research a community issue during City Experience.
- Biomes and food security
MATHEMATICS

MATHEMATICS PATHWAYS FROM YEAR 9 TO YEAR 12

Year 9 Mathematics

Year 9
- Mathematics A
- Mathematics A & Mathematics B

Year 10
- Mathematical Methods CAS & General Maths B
- Mathematical Methods CAS only
- Mathematical Methods CAS & General Maths A

Year 11
- General Maths A
- Mathematical Methods CAS & General Maths A
- Mathematical Methods CAS only
- Mathematical Methods CAS & Further Maths
- Mathematical Methods CAS

Year 12
- Mathematical Methods CAS & Specialist Maths
- Mathematical Methods CAS & Further Maths
- Mathematical Methods CAS

Key
- Usual pathway based on satisfactory completion
- Possible pathway

Preparation Mathematics
- VCAL Numeracy (only students in VCAL Program)
CORE SUBJECTS

MATHEMATICS

Length of Course
Full year subject

Aims

- To provide students with the opportunity to study Mathematics in the areas of number theory, algebra, geometry, measurement, trigonometry, and statistics.
- To prepare students for Year 10 Mathematics subjects.

Subject Content

The course in this subject will involve study in the following topics

- Number
- Algebra
- Geometry
- Measurement
- Trigonometry
- Probability & Statistics
- Solving Equations
- Graphing
- Quadratics.

Pathways into Year 10

- Eligibility for inclusion in both Mathematics A and Mathematics B requires a ‘C’ or above topic test average in both semesters at Year 9.
- Eligibility for Mathematics A only requires a ‘D’ or above topic test average in both semesters at Year 9.
- Preparation Mathematics is appropriate for students who had difficulty in achieving a satisfactory result during Year 9 Mathematics or who were on a modified program.

ACCELERATED MATHEMATICS

Accelerated Mathematics will be offered to students who have studied Year 8 Extension Mathematics.

The course will allow students who are highly motivated to study Mathematics at a higher level of complexity and at a higher level than other Year 9 students.

A possible pathway for these students is shown in the extension mathematics diagram shown on the next page.
During Year 7 & Year 8, students complete the Year 7-9 Mathematics Curriculum.

In Year 9, students complete Year 10 Mathematics B as their CORE Maths & Year 10 Mathematics A as one of their electives.

Key

Usual Pathway based on satisfactory completion

- Year 7 Extension Mathematics
- Year 8 Extension Mathematics
- Year 10 Mathematics A & Year 10 Mathematics B
- VCE General Mathematics B Units 1 & 2
- Mathematical Methods CAS Units 1 & 2 and Further Mathematics Units 3 & 4
- Mathematical Methods CAS Units 3 & 4 and Specialist Mathematics Units 3 & 4
CORE SUBJECTS

MATHMATICS A

Overview

Mathematics A has two main aims

- To give students a general background in Mathematics which builds on previous knowledge
- To prepare students for further study in mathematics at VCE level

Content / Skills

Students will study:

- Mensuration - Pythagoras' Theorem, area, surface area and volume
- Algebra - expanding and factorising linear, and simple quadratic equations
- Linear relationships - gradient, intercepts, lines of best fit, simultaneous equations, and inequations
- Trigonometry - trigonometric ratios, calculations in two and three dimensions
- Probability
- Statistics

Eligibility

- Eligibility for Mathematics A of year 8 requires students to have studied year 8 Maths Extension.
Mathematics B

Overview

Mathematics B must be taken in conjunction with mathematics A. The topics studied build on, and extend the topics done in Mathematics A. There are also topics that specifically relate to the VCE Mathematics Study Design. Students will have the opportunity to use graphics calculators to develop their skills in the use of the technology, prior to studying VCE.

Content/ Skills

Students will study:

- Number - indices and index laws, standard form, surds, exponential relationships
- Quadratic relationships - algebraic techniques for factorising and solving quadratic equations, graphing techniques
- Geometry: circle theorems and construction; 3-dimensional drawing and the geometry of solids; triangle construction; transformations, the unit circle
- Matrices - definition, addition, subtraction, multiplication, inverses, application in equation solving and practical situations.

Eligibility

- Eligibility of Mathematics B requires students to have studied Year 8 Mathematics Extension:
CORE SUBJECTS

SCIENCE

Length of Course
Full year subject

Aims

- To develop scientific knowledge.
- To use a range of tools (i.e. computer models and simulations) to explain and interpret observations.
- Perform and design controlled experiments.
- Present data and reports of investigations.

Subject Content

- Introduction to Science

- Biology
  - Living with microbes
  - Ecosystems
  - Body Balance

- Chemistry
  - Everyday reactions

- Physics
  - Light and sound
  - Using electricity
  - Electrical Energy
  - Inside the Atom
  - Communication Technology

- Geology
  - Dynamic Earth
FRENCH

Length of Course
Full year subject

Aims

• To improve communication, listening, reading and writing skills in French on a variety of specified topics.
• To enjoy and find value in a wide range of language activities to promote interest in the French way of life, geography and history.
• To encourage students to recognise the connection between different languages and to enhance their appreciation of their own cultural background.

Subject Content

• Young people in France & Australia penfriends
• Planning and going on a trip to Paris & other places in France
• How people use their French outside of the classroom
• The French speaking presence in Melbourne.

During these topics, new parts of grammar will be introduced. These include irregular verbs, simple past and future tenses.

Some topics in the Personal world, health and travelling will be covered and students will complete a Travel Destination project in Semester Two.

Pre-Requisite

Students to have studied French in Years 7 & 8 prior to this course.
**ITALIAN**

**Length of Course**
Full year subject

**Aims**
- To improve communication, listening, reading and writing skills in Italian on a variety of specified topics.
- To enjoy and find value in a wide range of language activities to promote interest in the French way of life, geography and history.
- To encourage students to recognise the connection between different languages and to enhance their appreciation of their own cultural background.

**Subject Content**
- Young people in Italy & Australia penfriends
- Planning and going on a trip to Rome & other places in Italy
- How people use their Italian outside of the classroom
- The Italian speaking presence in Melbourne.

During these topics, new parts of grammar will be introduced. These include irregular verbs, simple past and future tenses.

Some topics in the Personal world, health and travelling will be covered and students will complete a Travel Destination project in Semester Two.

**Pre-Requisite**
Students to have studied Italian in Years 7 & 8 prior to this course.
CORE SUBJECTS

JAPANESE (2ND LANGUAGE)

Length of Course
Full year subject

Aims
- To improve communication and writing skills in Japanese on a variety of specified topics.
- To enjoy and find value in a wide range of language activities to promote interest in the Japanese way of life, geography and history.
- To encourage students to recognise the connection between different languages and to enhance their appreciation of their own cultural background.

Subject Content
Revision of topics covered in Years 7 & 8, followed by a variety of new topics including:
- Weather
- Seasons and festivals
- Folk tales
- Shopping
- Food
- Reading and writing Kanji
- Word processing in Japanese scripts using the school computers
- The Japanese presence in Melbourne’s CBD

Pre-Requisite
Some topics in Japanese history and culture will be covered, and students will complete cultural projects.
CORE SUBJECTS

VIETNAMESE

Length of Course
Full year subject

Aims

- To provide students with the ability to read and write in such a way as to allow them to be aware of their surroundings in Vietnamese.
- To prepare students with the basic fundamentals in understanding the Vietnamese language.
- To help students develop and understand an awareness of the way different ideas can be expressed in Vietnamese.

Subject Content

- Education
- Career
- Commerce
- Transport
- Travelling
- Sports
- Health and Environment
- Science and Technology
- History - Vietnamese Heroes: Tran Hung Dao & Ly Thuong Kiet
- The Vietnamese presence in Melbourne's CBD

Additional Information

It is assumed that students are able to speak in Vietnamese and have a basic ability to read and write in Vietnamese.

Pre-Requisite

Basic reading and writing skills are required to be accepted into this course.
ELECTIVE SUBJECTS

Arts

Art

Length of Course
One semester

Aims

- To develop an understanding of the art-making process for 2 Dimensional Works.
- To inquire into art materials and techniques.

Subject Content

- Students will develop an understanding of the elements of 2 Dimensional Art through drawing, painting and print-making.
- Students will develop their ideas and thoughts within a workbook.
- Students will make a range of artworks based on their workbook designs.
- Students will explore and respond to various historic styles and Artists’ individual approached to 2D art making.
**ELECTIVE SUBJECTS**

**Arts**

**DANCE**

**Overview**

Students will choreograph and perform duet and group dances to communicate ideas, experiences and artistic intentions for different purposes, contexts and audiences. They will develop and apply understanding of the processes of dance composition for choreography using a range of dance elements, genres, styles, techniques, conventions and practices. Students will develop awareness of Australian and international dance artists, companies and practices, expanding their understanding of the cultural dimensions of dance and informing their own compositions and performances. They will use the language of dance to analyse and respond critically to a range of dance works.

**Content/Skills**

Students will study:
- Elements of Dance – Body, Action, Space, Time, Energy
- Technical Skills – Accuracy, Control, Balance, Rhythm, Flow, Focus
- Expressive Skills – Involvement of Whole Self, Projection, Interpretation, Musicality, Group Awareness

**Eligibility**

The study of the Arts is an inclusive curriculum. This subject is open to all Year 9 students and is an ideal platform to celebrate diversity.

**Pathways**

Successful completion of Year 9 Dance begins a pathway to enrolling in VET & VCE Dance in Years 11 and 12.
ELECTIVE SUBJECTS

Arts

Drama

Length of Course
One semester

Aims

- To develop expressive skills such as movement, voice, mime, improvisation and characterisation.
- To develop a knowledge of dramatic elements (or concepts) such as plot, gesture, space, symbol and conflict.
- To become familiar with basic stagecraft elements such as costume, props, make-up, sound and lights.
- To develop a knowledge of different theatre styles, including Storytelling, Melodrama, Comedy, Naturalism and Non-naturalism.
- To confidently present work in class and in front of an audience.
- To accept responsibility when working in small or large groups.
- To reflect on work done in class, through discussions and by keeping a journal.
- To develop a language with which to talk and write about drama.
- To develop script writing and script adaptation skills.
- To develop an understanding of theatrical conventions.
- To analyse and evaluate a professional performance.

Subject Content

- Activities to develop expressive skills and an understanding of dramatic elements, including character development, mime, role plays and Theatre sports. This will involve individual work as well as small and large group work.
- Lessons to teach theatre skills, such as make-up, sound and lights.
- The study of Melodrama, Storytelling, Comedy, Naturalism and Non-Naturalism.
- The development of a play in the style of either a Melodrama, Storytelling, Comedy, Naturalism or Non-Naturalism including workshops, improvisations and rehearsals.
- At least one presentation of a play using a particular performance style.
- A journal, which will include answers to questions, notes, ideas and thoughts of class activities.
- A research project on Melodrama or Comedy.
- A performance analysis on a professional performance.
- Script writing and Script adaptation.
ELECTIVE SUBJECTS

Arts

MULTIMEDIA ART & DESIGN

Length of Course
One semester

Aims

- Students increase their knowledge of computer application in a range of design processes
- Develop and apply knowledge of production and manipulation of digital images.

Subject Content

- Create a range of imagery from digital stills to animation
- Apply the design process to create and manipulate digital images
- Explore industrial knowledge including health and safety
- Apply a range of multimedia software, equipment and processes including digital projection, scanning, printing, animation and digital photography to create artworks and visual designs
- Produce and manipulate digital images; create, manipulate and incorporate 2D graphics and create web pages
ELECTIVE SUBJECTS
Arts

MUSIC PERFORMANCE

Length of Course
One semester or two semesters

Aims
- To develop skills in practical music and performance in solo and group contexts.
- To present a prepared program in performance.
- To develop skills in the creative organisation of sound.
- To develop aural comprehension skills.
- To become familiar and experiment with the characteristics of the work of selected composers and performers.
- To develop an awareness of aspects of the instrument and the performer.

Subject Content
- Music theory: Grade 1 A.M.E.B. or other appropriate level
- Instrument study - solo skill development
- Group performance skill development
- Studies in musical style - Perspectives in performance
- Creative organisation of sound - composing, improving and arranging
- Aural comprehension development

Additional Information
The Year 9 Music course may vary according to student background and interest, and can range from Classical to Rock / Pop.

The subject is designed to enable students to develop the necessary skills to play an instrument in both solo and group contexts and in developing general musicianship.

Students will develop skills in the organisation of sound, exploring the use of modern technology, aural training and analytical skills through listening, performance and studying musical concepts.

In specially approved cases it may be possible for a student to undertake this course for a full year.
ELECTIVE SUBJECTS

Arts

Visual Communication

Length of Course
One semester

Aims

- To provide an introduction to advanced graphic techniques, elements, principles, devices and systems.
- To provide experiences which will enable the students to better understand careers in Art/Craft teaching, Advertising, Architecture, Graphic Design, Computer Graphics, Fashion, and Interior Design.

Subject Content

Students explore information design, promotional design, and technical design.

Students are involved in a range of inquiries including:

- Freehand, Instrumental and Computer Generated Designs
- Mapping
- Symbols
- Technical Drawing and Product design
- Illustration

Additional Information:

This course is suitable for students considering a career in the commercial arts, design, engineering or architecture.
ELECTIVE SUBJECTS
Design, Creativity & Technology

ELECTRONIC SYSTEMS

Length of Course
One semester

Aims

- To design and construct a number of devices and systems making use of a range of materials and energy sources.
- To develop the process of problem solving through the investigation, design, production and evaluation of electronic circuits.

Subject Content

Possible topics could include:

- Making toys, robots and working models
- Games, including electronic devices and board games
- Plant control systems (for growing, watering etc)
- Switches, alarms, security systems
- Devices for disabled people
ELECTIVE SUBJECTS
DESIGN, CREATIVITY & TECHNOLOGY

FOOD & TECHNOLOGY

Length of Course
One semester

Aims

- To develop problem solving techniques for use with the design process - investigate, design, produce, evaluate.
- To use and evaluate a range of tools, equipment and machines.
- To develop awareness of dietary needs.

Subject Content

- Developing recipes and work plans
- Using tools, equipment & machines
- Explore nutritional requirements
- Develop understanding of design briefs and workplans

Additional Information:

This course enables students to access a range of year 10 courses in Food for Thought and Food Technology and Health.
ELECTIVE SUBJECTS
Design, Creativity & Technology

TEXTILES

Length of Course
One semester

Aims

• To build up a basic knowledge of and practical skills relating to the use of tools, machines and equipment and the techniques and processes involved in the production and use of textiles.
• To build up a sense of achievement through self-expression and self-reliance in using new skills and to adapt these skills using the design process.

Subject Content

• Fabric Decoration, e.g. machine embroidery, applique and craft work, basic pattern development.
• Written Assignment Work to cover use and care of equipment, and the technology of the construction of fibres.
ELECTIVE SUBJECTS
Design, Creativity & Technology

WOODWORK

Length of Course
One semester

Aims

- To develop basic skills and techniques associated with the use of wood.
- To encourage the use of design principles and concepts and develop problem solving skills.

Subject Content

- Theory: Advancement in related technology, health and safety, and the nature of materials used and the care of tools
- Skills in designing and planning of individual projects, and problem solving
- The use of some simple power tools and machines
- The practical and appropriate use of hand tools
- Basic processes such as cutting, shaping and joining of wood.
ELECTIVE SUBJECTS

INFORMATION & TECHNOLOGY

INFORMATION & COMMUNICATION TECHNOLOGY

Length of Course
One semester

Aims

- To learn the operation of different software programs.
- To describe the types and functions of some information technology developments and explain how the developments have affected both individuals and society.
- To plan and implement solutions to specific information problems, and evaluate the efficiency of the processes and the quality of the information produced.

Subject Content

- Proper use and care of computer equipment
- Experience in using different software through the completion of folio work.
- Investigation of the basic operating principals and functions of different types of information technology equipment
- Solve information problems for specific audiences
- Apply the four phases of the technology process: investigating, designing, producing and evaluating
- Produce solution to problems using design briefs

Other Information

Students using IBM compatible computers with the latest Microsoft software.
ELECTIVE SUBJECTS

HEALTH & PHYSICAL EDUCATION

HEALTH EDUCATION

Length of Course:
One semester

Aims

- To enable students to increase their knowledge and understanding of the social, emotional and physical dimensions of health and the ways.
- To examine the ways in which good health might be achieved, by examining the major health interests and concerns of all sections of the community.

Subject Content

- **What is Health**
  Looking a major cause of illness, injury and death. Health across the lifespan, and factors that affect health.

  Establishing identity, expressing independence and rights and responsibilities of young people.

- **Understanding Mental Health**
  Importance of family and friends, bullying and mental health strategies to enhance mental health.

NOTE: There is a charge of approximately $27.50 per year for this program to cover the cost of excursions and external programs.
ELECTIVE SUBJECTS
HEALTH & PHYSICAL EDUCATION

ELITE EXERCISE SCIENCE

Length of Course
One semester

Aims
- Develop theory and practical knowledge skills required to participate in VCE Physical Education and VET Sport and REC.
- Introduce students to the theoretical aspects and academy vocabulary used throughout Exercise Science in Year 10.
- Develop leadership skills and be involved in all aspects of Sport inc. Coaching, participating and analysing skill performance.

Subject Content
Emphasis on academic vocabulary and theoretical concepts used throughout Exercise Science and Physical Education inc.:
- Sports Coaching
- Anatomy and Physiology
- Energy Systems
- Physiological response to exercise
- Ethical considerations in sports

Participate in various team and individual sports including but not limited to:
- Netball
- Football
- Rock Climbing
- Archery
ELECTIVE SUBJECTS

HEALTH & PHYSICAL EDUCATION

PHYSICAL EDUCATION - THEORY & PRACTICE

Length of Course
One semester

Aims

- To develop the desire and ability to actively participate in physical activity throughout life.
- To develop the ability, knowledge and understanding of movement and movement skills in a range of physical recreation pursuits.
- To develop theory and practical knowledge and skills required to participate in VCE Physical Education.

Subject Content

- Consists of two practical classes per week and one theoretical class per week.
- The structures, functions and workings of the skeletal system, muscular system, circulatory system and respiratory system
- Nutrition – food for fitness
- Fitness fads and fallacies
- Practical activities – activities may vary according to student interest and background. Traditional sports such as badminton and football codes, as well as other recreational pursuits such as Leisure Centre activities (weight training, boxacise, aerobics etc), ten pin bowling and roller blading may be included.

Required Equipment

- School Sports tracksuit pants / shorts
- School Sports polo top and tracksuit top
- Runners

NOTE: There is a charge of approximately $27.50 per year for this program to cover the cost of excursions and external programs.
ELECTIVE SUBJECTS

SCIENCE

HORTICULTURE

Length of Course
One semester

Aims

- To develop a range of skills in understanding agricultural sciences.
- To develop an understanding of issues associated with contemporary agricultural practice.
- To learn how to Plan, Prepare and Develop a range of ‘landscaping’
- To learn about a diversity of plants and their needs
- To grow a range of plants that have diverse needs

Subject Content

- Diversity of plants and their needs – commercial crops and local native species
- Diverse reproduction of plant species and how to propagate them
- Landscaping and garden design
- Growing food crops
- Taking action in the community with links and excursions to visit Iramoo Grasslands, Padley Park and Strathbogie Ranges
ADVANCE – DUKE OF EDINBURGH’S AWARD (DUKES)

Length of Course
Two semesters

ADVANCE is a school-based initiative of the Department of Human Services (DHS) and is a partnership between the Office of Youth (OFY), Victorian Government secondary schools and community organisations. Students complete the Duke of Edinburgh’s Bronze Award (DUKES). It comprises four sections: Community Service, Skills, Physical Recreation and Adventurous Journey. In the Awards program, students raise their level of fitness, improve a skill of their choice and prepare for an adventurous journey through outdoor living skills such as bushwalking, camp set-up, bush cooking and navigation. Students complete a Level 1 First Aid Course, including CPR; present at the Kids Teaching Kids Conference and learn about people with disabilities (SCOPE).

Aims

The DUKES concept is an individual challenge designed to encourage young people to develop into mature, active citizens who will positively contribute towards society. The aims are for students to:

- Plan and engage in a volunteering activity in the school or local community.
- Participate and actively take part in camps, excursions and class-based activities.
- Consistently spend time on skills, fitness and community service to successfully complete the bronze Duke of Edinburgh’s Award.

Subject Content

- DUKES Award
- Environmental/Sustainability programs
- Disability programs (SCOPE)
- CPR/Basic First Aid
- Kids Teaching Kids presentations
- Team building
- Leadership
- Volunteering – Community participation
- Bushwalking & Risk Management
- Camping & outdoor cooking
- Navigation, maps & compasses

Selection criteria:

Students must complete a written application to be considered for ADVANCE and be nominated by their Year 8 teachers.

NOTE: There is a charge of $300 to cover the cost of camps, excursions and external programs.
**ELECTIVE SUBJECTS**

**EXTENSION**

**FORENSIC SCIENCE**

**Length of Course**
One semester

**Aims**
- To investigate the theoretical and practical aspects of Forensic Science through experiments, case studies and simulations.

**Subject Content**
- Crime Scene Investigation
- Collection of Evidence
- Forensic Odontology (dentistry)
- Fingerprinting
- Blood Serology
- Investigating Fraud
- Questionable documents and handwriting
- Computer Simulated Crime Scene Investigation
- Relevant Science competitions, activities and excursions.

**Special Note**
This Science Enrichment unit would be of interest to students who enjoy, and are good at Science.

Recommendation from your Year 8 Science teacher will be required for entrance into this unit.
